CPU scaling · 8,000,000 total iterations · wall_time_s
Successful measured runs only · n per worker: 20, 20, 20, 20
Execution time
Median; whiskers = min–max
Time (seconds)
Workers
Speedup relative to 1 worker(s)
Observed
Ideal linear scaling
Speedup (×)
Workers
Relative parallel efficiency
Ideal: 100%
Efficiency (%)
Workers
Measured timing distribution (all samples shown)
